

# HEAT PIPE SOLAR TUBE COLLECTOR

## SP-S58 Series

With 58x1800mm evacuated heat pipe vacuum tubes

### EXCELLENT VALUE:

- High performance evacuated heat pipe tube collectors
- Maintenance free

### QUICK & EASY INSTALLATION:

- All parts can be carried individually onto the roof for assembly
- Tubes simply plug into dry pockets within the manifold casing

### WEATHER RESISTANT:

- Capable of resisting 35mm diameter hailstones, 80m/h (130 km/h) winds and snow load 1000 Pa

### DURABLE, FLEXIBLE AND STYLISH:

- 10 years warranty, plus long lifespan
- Works best in a south facing direction or can be adapted to work in an east / west facing direction
- Mounting options - Fixes directly onto a pitched roof
- Adjustable A-frames available for flat roofs or ground mounting

### FULLY COMPLIANT WITH WORLDWIDE STANDARDS:

- Solar Keymark No: 011-7S695 R
- ETL No: 01746 (qualified for Energy Technology List in UK)
- Eligible for Renewable Heat Incentive (RHI) and UK Government grants

### EVACUATED HEAT PIPE VACUUM TUBE: MODEL SP-TT58

|                      |                        |
|----------------------|------------------------|
| Size of Condenser    | φ14 × 64.5 mm          |
| Length of Glass Tube | 1800 mm                |
| Outer Tube Diametre  | φ58 mm                 |
| Inner Tube Diametre  | φ47 mm                 |
| Glass Thickness      | 2 × 1.6 mm             |
| Glass Material       | Borosilicate Glass 3.3 |

|  |                               |
|--|-------------------------------|
| Absorptive Coating                                 | ALN/AIN - SS/CU               |
| Absorption Coefficient                             | >92%                          |
| Emission Coefficient                               | <8%                           |
| Vacuum   | P < 3.5 × 10 <sup>-3</sup> Pa |
| Net Weight   | 2.70 kg                       |
| Hot Water Output (17Mj/m <sup>2</sup> .dayΔT=45°C) | 9L                            |
